Profile

Full-Stack Developer with hands-on experience building and deploying end-to-end web applications. **Specializing** in Golang (Gin) for high-performance REST API development and React for responsive, component-driven frontends. Proficient in PostgreSQL database design, JWT-based authentication, Redis caching, and Docker containerization. Committed to writing clean, maintainable code and delivering scalable solutions across the full technology stack.

Skills

Frontend

- React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Redux

Backend

- Golang, Gin Framework, REST API Development, JWT Authentication, Middleware, Dependency Injection

Database

- PostgreSQL, GORM, Redis (Caching, OTP Handling)

Tools & Deployment

- Git, GitHub, Postman, Docker, Vercel, Railway

Soft Skills

- Problem Solving, Debugging, Analytical Thinking, Team Collaboration, Communication, Time Management

Professional Experience

Full-Stack Developer — Bridgeon Solutions, Calicut

Aug 2025 – Present

- Designed and built scalable **RESTful APIs** using **Golang (Gin)**, implementing **JWT authentication**, **role-based access control**, and **middleware pipelines** for secure endpoints
- Architected and managed **PostgreSQL** schemas using **GORM**, and integrated **Redis** caching for **OTP handling** and performance optimization
- Developed responsive frontend components using **React**, **Redux**, and **Tailwind CSS**, ensuring seamless integration with backend services
- Containerized applications using **Docker** and followed a **service-repository architecture**, improving code maintainability and deployment consistency

Projects

MULTIBRAND — E-Commerce Web Application

- Engineered a production-grade full-stack e-commerce platform with a **Golang (Gin)** backend and **React** frontend, following a **clean layered architecture**
- Built secure **REST APIs** with **JWT authentication** and **role-based access control** for both customer and admin flows
- Designed relational **PostgreSQL schemas** using **GORM**; implemented **Redis** caching for **OTP workflows**, reducing database load and improving response time
- Developed admin dashboard features for real-time **product**, **user**, and **order management**
- Deployed the full application stack using **Docker** (backend), **Railway** (server), and **Vercel** (frontend)
- Strengthened practical knowledge of **scalable system design**, **API architecture**, and **CI/CD pipelines**

Education

Bachelor of Commerce in Computer Application | University of Calicut | 2020 – 2023
